The Gas Saver™ logo identifies those HVAC Direct® furnaces with a fuel efficiency level of 95 AFUE or higher.

ENERGY EFFICIENCY IS KEY...

To controlling the cost and comfort of heating your home

The HVAC Direct® brand HMM95 Gas Saver™ DualSaver™ Gas Furnace is the answer to your family's heating needs. HVAC Direct has always been a leader in providing high-quality heating products at a refreshingly comfortable price.

Now, with new DualSaver technology, the HMM95 Furnace will provide you with eventemperature warmth, improved air quality and quiet operation. Plus, the money you'll save on utility bills as compared to lower AFUE furnaces.

For consistent heating comfort you can count on

Unlike conventional, single-stage furnace technology, HVAC Direct's DualSaver technology eliminates the temperature swings resulting from abrupt, high-stage stops-and-starts of the furnace by operating at a low heating stage the majority of the time. This enables your HVAC Direct HMM95 furnace to gradually and pleasantly increase the temperature of your home environment. And if low-stage heating doesn't warm your home to the desired temperature quickly enough, DualSaver shifts your furnace into high-stage to ensure your comfort.

Outstanding Energy Efficiency

Energy efficiency is the key to controlling the cost of heating your home. This furnace's 95% AFUE rating means that 95 cents of every \$1.00 of heating energy expense warms your home. Some older central heating systems rate at 60% AFUE, meaning only 60 cents of every \$1.00 of heating energy expense contributes to your home's heating.

When properly installed, your high-efficiency HVAC Direct brand HMM95 Furnace meets the stringent requirements of the Environmental Protection Agency's Energy Star Program.**

**Energy Star ratings are dependent upon conditions beyond equipment installation. To make certain your HVAC equipment qualifies for the Energy Star designation get complete information at www.energystar.gov.

Other benefits of DualSaver™ Technology include:

Quiet furnace operation.

Helps to eliminate the stagnant pockets of air that can form when the furnace stops running.

Increased air filtration providing improved air quality.

QUALITY MANUFACTURING BACKED BY EXCEPTIONAL WARRANTIES*

Quiet Operation

The components of your HVAC Direct HMM95 Furnace including the multi-speed blower and two-stage gas valve have been specially selected to reduce the noise levels common in other furnaces without these features. Plus, we house these components in a fully insulated, heavy-gauge steel cabinet. The result... quiet comfort.

Long System Life

The heart of any furnace is the heat exchanger. Our patented, aluminized-steel tubular heat exchanger and stainless-steel recuperative coil have been tested to industry standards.

For further safety and reliability, we also include our high-quality Silicon Nitride Igniter, the most durable igniter in the industry, that helps ensure safe start-ups and maximum igniter life. Additionally, the HVAC Direct brand HMM95 Furnace is designed to minimize NOx emissions, contributing to better air quality.

Outstanding Product Warranties*

We back our HVAC Direct HMM95 DualSaver Multi-Speed Furnace with what we believe to be one of the best warranties* in the industry. We cover its heat exchanger with a Lifetime Heat Exchanger Limited Warranty* for as long as you own your home and provide a 10-Year Limited Parts Warranty* on all remaining functional parts. Even better, if the heat exchanger fails within the first 10 years of use by the original, registered homeowner, we'll provide a replacement furnace for free!*
